

## The centre for London's built environment

The programme of exhibitions, events and publications brings together leading professionals in the public and private sector, politicians and the general public, to share knowledge and identify the challenges and opportunities of the capital's built environment.

The NLA galleries, which feature the Pipers Central London model, are open to the public six days a week and attract over

2500 visitors from London and abroad each week.

The NLA website includes a comprehensive project directory to keep Londoners up to date with new architecture and development taking place across the capital. They can find out about projects that are recently completed, currently under construction or planned to alter London's fabric over the coming years.

The centre for  
London's built  
environment
